## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: elements (82) and (244) not shown in the drawing.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6, 7-25, 33,34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (795).

Anderson (795) discloses a method and apparatus showing the positioning of the body portion (umbilical cord) within a curved shield member (21) of medical grade material (Col. 4, lns. 51-55), and inserting an insertion member into the umbilical cord to extract blood (Col. 5, lns. 21-67) in the form of a hollow needle (73). Regarding Claim 11, the withdrawal step and the removing the body portion of obvious steps that the physician would take to complete the process.

*Stabilization is obvious. Col 2, lns. 45-50  
Col 3 lns. 9-12*

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 26-32 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (795) in view of Gleason.

Anderson (795) discloses the limitations above but does not disclose the use of the device with a kit.

Gleason discloses the use of a blood collection/sampling device in a kit in an analogous art for the purpose of having ready access to all of the necessary devices to perform the operation. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the device of Anderson (795) as shown by Gleason because inclusion of the device in a kit would make the device more useful when it would be needed.

Any questions regarding this application can be addressed to Pamela Wingood who can be reached on (703)308-2676.
